

## ADVICE DESK

**During our years of service provision in the advice and counselling arenas we have developed a person or client driven practice.**

**In the main our aim is to support our clients to resolve their issues for themselves. In keeping with a therapeutic understanding that we are all able to see solutions to our problems from with-in ourselves. Time, support, and stressors all impact on our ability to tackle personal issues. Together we seek what is right for the client.**

**We offer a safe environment where a variety of tasks can be undertaken. Form completion, mediation, housing issues, debt advice, and many other issues can be explored.**

**We operate as a network member of our local community and are glad to seek referrals to other groups for specialist input.**
